Lessons From Ia: The Ecology And Conservation Of A Fragmented Forest

Synopsis

Deforestation is occurring at an alarming rate in many parts of the world, causing destruction of natural habitat and fragmentation of what remains. Nowhere is this problem more pressing than in the rainforest, which is rapidly vanishing in the face of enormous pressure from humans to exploit it. This book presents the results of the longest-running and most comprehensive study of forest fragmentation ever undertaken, the Biological Dynamics of Forest Fragments Project (BDFFP) in central ia, the only experimental study of tropical forest fragmentation in which baseline data are available before isolation from continuous forest took place. A joint project of Brazil's National Institute for Research in ia and the U.S. Smithsonian Institution, the BDFFP has investigated the many effects that habitat fragmentation has on plants, invertebrates, and vertebrates. The book provides an overview of the BDFFP, reports on its case studies, looks at forest ecology and tree genetics, and considers what issues are involved in establishing conservation and management guidelines.

Book Information

Hardcover: 496 pages

Publisher: Yale University Press (September 2001)

Language: English

ISBN-10: 0300084838

ISBN-13: 978-0300084832

Product Dimensions: 7.3 x 1.5 x 10.2 inches

Shipping Weight: 2.7 pounds (View shipping rates and policies)

Average Customer Review: 4.0 out of 5 starsÂ See all reviewsÂ (1 customer review)

Best Sellers Rank: #3,064,827 in Books (See Top 100 in Books) #60 inÂ Books > Science & Math > Nature & Ecology > Ecosystems > Tropical #2681 inÂ Books > Science & Math > Earth Sciences > Rivers #2843 inÂ Books > Science & Math > Earth Sciences > Climatology

Customer Reviews

excellent read, very good book would purchase as a gift also
