Customer Reviews

The book includes four paper tests and four online tests. Of course you have to enter all sorts of personal information and they will be bothering my son forever now that they have him in their database. What's worse is to access the four tests your browser has to pass their minimum requirements and your browser better not be Chrome. Edge doesn't seem to work either. Firefox couldn't pass the test. I thought I had Internet Explorer passing the 8-9 different criteria but now I have to go into the Java Control Panel to do a bunch of monkeying around. Their site points you to Java 7 which isn't even available anymore. They have a massive problem on their hands because their website is hopelessly screwed up. ****It's absolutely ridiculous.**** So, if you're buying this book for the eight tests, keep in mind that there's **ONLY FOUR TESTS IN THE BOOK**. After doing everything possible to get the site to work and getting all green checkmarks and doing everything listed below it still will not allow me to actually use the online tests. Horrendous and extremely disappointing. BTW, here are the Java Control Panel recommendations for Windows in case you need them: Once Java has been installed, adjust the following setting in the Java Control Panel. 1. Close all web browsers. 2. Open the Java Control Panel : Tap the Windows key on your keyboard (between the Ctrl and Alt keys), then type "Java Control Panel" (without quotes) and hit Enter. The Java Control Panel window will open. 3. Select the "Security" tab. 4. Click the "Edit Site List" button, under the Exception Site List heading. 5. Click the "Add" button in the Exception Site List window. 6. a. Enter their URL (without quotes). b. Enter another URL (without quotes).
