Poisonous Dwellers Of The Desert: Description, Habitat, Prevention, Treatment

Synopsis

Exquisitely detailed line drawings by Barbara Terkian make it easy for newcomers to identify dangerous desert insects, spiders, scorpions, centipedes, snakes, and lizards, in an easy-reference format. Also describes treatments and antidotes for bites and stings. Includes glossary.

Customer Reviews

This is a great reference book for us. Since we are new to the Arizona area it provided a lot of useful information. It is also in the National Parks Bookstores in the Sedona Area.

It is small reference book that pictures and describes critters we should avoid. I had this book when my children were young and would read this to them and show them what to avoid and why I tell them to not pick up rocks in the desert w/o kicking them over, etc. It was a great reference book. I ordered this for my grandkids who are now desert dwellers too !!!
